Dear Client,

The CRL has received your samples for the project Middletown, OH and logged them into our Laboratory Information Management System (LIMS). Please review the attached LIMS work order for accuracy. If you identify any errors (e.g. incorrect sample IDs with regard to spelling, spacing, and/or capitalization, turn-around-times, or assigned analyses, etc.), please contact the laboratory for correction immediately. NOTE: Differences between the Chain of Custody (COC) and sample tags/labels deemed insignificant (spacing, etc.) are reconciled using the best judgment of the Sample Custodian. If no response is received within 48-hours, the CRL will assume the LIMS work order is accurate.

Thank you.

Rob Snyder, Sample Custodian  
(312) 353-9083

Rob Thompson, Sample Coordinator  
(312) 353-9078
